---

EXPERIENCE

Fringe Theatre
Junior Frontend Developer

Edmonton, Alberta
Oct. 2022 – Apr. 2023

- Migrated the frontend from Django templates + Bootstrap 4 with a jQuery dependency to React + Tailwind CSS.
- Tested frontend pages and components thoroughly with React Testing Library and Jest using unit and integration tests.
- Ensured frontend accessibility by expanding on Radix UI and Headless UI primitives to build components.
- Collaborated frequently with the project's stakeholders in redesigning the frontend to optimally meet end-user needs.

Live Well Exercise Clinic
Software Developer Volunteer

Edmonton, Alberta
Jul. 2020 – Sep. 2020

- Developed 2 administrative dashboards to facilitate site navigation for company administrators.
- Added breadcrumbs to 12 webpages to improve customers' ease of access to previously visited webpages.
- Reorganized portions of the existing file structure in the codebase to enable easier code debugging.
- Wrote RSpec tests to ensure the validity of newly written code.

PROJECTS

Nimboard
React, Next.js, Tailwind, Contentlayer, TypeScript, Supabase

Edmonton, Alberta
Jun. 2023 – Present

- Collaborated with the Nimboard team to expand the user interface design, updating the look and feel of the app's context menu, toolbar and dialog components, and more.
- Improved the developer experience by replacing duplicated UI elements with shadcn components.
- Built the interface for sharing board links with other users and sharing board links to the web.

Portfolio
React, Next.js, Tailwind, Contentlayer, TypeScript, Husky, Lint-staged

Edmonton, Alberta
Jun. 2023 – Present

- Built a portfolio for housing the projects that I work on and the learnings I gain from building components, layouts and templates from scratch.
- Used Contentlayer to simplify the process of adding/editing long-form written information in the portfolio by separating the long-form writing functionalities from the coding functionalities of the portfolio.
- Developed a text editor capable of parsing plain text or markdown syntax with ProseMirror, while using next-themes to manage the portfolio projects' light and dark themes.

CMPUT 401 Project Portal
React, TypeScript, Material-UI, CSS, Django, Django Rest Framework, Python, PostgreSQL, Husky

Edmonton, Alberta
Sep. 2021 – Dec. 2021

- Developed a web portal that enables the University of Alberta's CMPUT 401 administrators to display the project collaborations between CMPUT 401 students and external clients (non-profits, early-stage startups, academic clients, etc.).
- Implemented CI/CD workflows with GitHub Actions and used Husky with Lint-Staged, ESLint and Prettier to automate code checks and to ensure that bad code was never merged into the main branch.
- Led the development process for 75% of the sprints as a product owner to ensure that client needs were met.
